RECTRIX ANNOUNCES DEVELOPMENT PLANS FOR SARASOTA-BRADENTON INTERNATIONAL AIRPORT

(Sarasota, FL – July 12, 2010) - Rectrix Commercial Aviation Service, Inc. today announced plans to expand operations at the Sarasota-Bradenton International Airport. The announcement follows the recent signing of a new lease agreement with the Sarasota-Bradenton International Airport, which will make four additional acres of land available for aviation-related development.

On this new site, Rectrix plans to build additional hangars to house large business class jets such as the Gulfstream 650. Rectrix is also exploring options for a FAA Part 145 repair station and self-service fueling area. The new construction will be adjacent to its Hangarminiums™, privately owned hangar spaces customized to fit an owner's needs, and the Rectrix Aerodrome Center, where amenities include concierge services and aircraft maintenance.

“This new lease and expansion will give us the opportunity to increase our customer base, support the local and regional economy by creating jobs, and meet the growing needs of our customers,” said Fiona Duddy, Vice President of Business Development for Rectrix. “This truly is significant for Rectrix, and shows our continued commitment to this community.”

About Rectrix

Rectrix Commercial Aviation Services, Inc. has been providing the highest level of private jet charter service, aircraft management and fixed base operations since 2005. The company was recently awarded the prestigious Platinum rating by ARGUS International, Inc. for its rigorous high safety standards. Rectrix Aviation, Inc. is a full service charter operation allowing clients to select flight times and aircraft ideal for their needs and to fly with experienced crews who maintain the strictest safety standards. The Rectrix Aerodrome Centers in Hyannis, MA (HYA) and Sarasota, FL (SRQ) are unique and immaculate facilities offering private passenger terminals and lounges, aircrew amenities and full aircraft handling services.
